

## Precision Plus Safety Scalpel

Enhancing Precision, Elevating Safety

Are you prioritizing safety in your surgical procedures? Southmedic is proud to introduce our latest innovation – Precision Plus Safety Scalpels with an enhanced safety mechanism. Designed with both precision and safety in mind, our blades offer unparalleled performance while ensuring the utmost protection for surgical teams and patients alike.

“Investing in a sharp scalpel is all about efficiency and speed. This is what the Southmedic blades provide.” - Dr. Allen, plastic surgeon

### Why Choose Southmedic’s Precision Plus Safety Scalpel?

- Meticulously crafted for **precision** and **safety**; top choice by surgeons for tissue separation and delicate procedures.
- Southmedic’s Precision Plus Safety Scalpels facilitate compliance with **OSHA guidelines**.
- Our Precision Plus Safety Scalpels undergo rigorous **quality control** measures to ensure **consistency** and **excellence**.
- Easy to use with **one-handed activation** suitable for both left and right-handed users.
- Blade is covered to prevent accidental cuts during hand-off and disposal. A **retractable guard** locks for protection after use, providing **security** and control during handling.
- Our bright orange safety scalpels are available in **sterile** and **non-sterile** options, and are not made with natural rubber latex.
